

2026 ARIZONA HOMICIDE INVESTIGATORS ASSOCIATION

ANNUAL CONFERENCE

WELCOME TO THE 2026 ARIZONA HOMICIDE INVESTIGATORS ASSOCIATION'S ANNUAL CONFERENCE

On behalf of the Association and the Board of Directors, we would like to extend our sincere appreciation to each of you for attending and continuing to support AHIA and its mission. As always, the Association is proud to host this annual conference in support of our members and, through them, the communities they serve every day. Your dedication to professional excellence, continued education, and collaborative partnerships helps strengthen Arizona agencies and entities to conduct efficient, thorough, and professional death and critical incident investigations. AHIA remains committed to providing relevant training and professional resources that equip investigators, supervisors, prosecutors, forensic professionals, and support personnel with the tools necessary to meet the evolving challenges of the past, present & future. We are grateful for the commitment each of you has made to advancing the standards of investigative excellence throughout Arizona.

The Association would also like to extend our sincere gratitude to the many vendors, sponsors, and professional partners whose generous support helped make this conference possible. We encourage all attendees to take time throughout the week to meet with them during breaks and learn more about the services and resources they provide to our profession. In addition to the outstanding presentations scheduled this week, we encourage everyone to use this opportunity to build lasting professional relationships. Communication, cooperation, and networking remain essential to success in our duty, and we strongly encourage you to introduce yourself to fellow attendees, vendors, and AHIA Board members throughout the conference.

The Association will also host several social events during the week, including **Comedy Night** on Monday, a **Top Golf Social** on Tuesday, a **Cornhole Tournament** on Wednesday, and Thursday's **Luncheon** where we will recognize several distinguished individuals as well as those who were elected or re-elected to the AHIA Board of Directors.

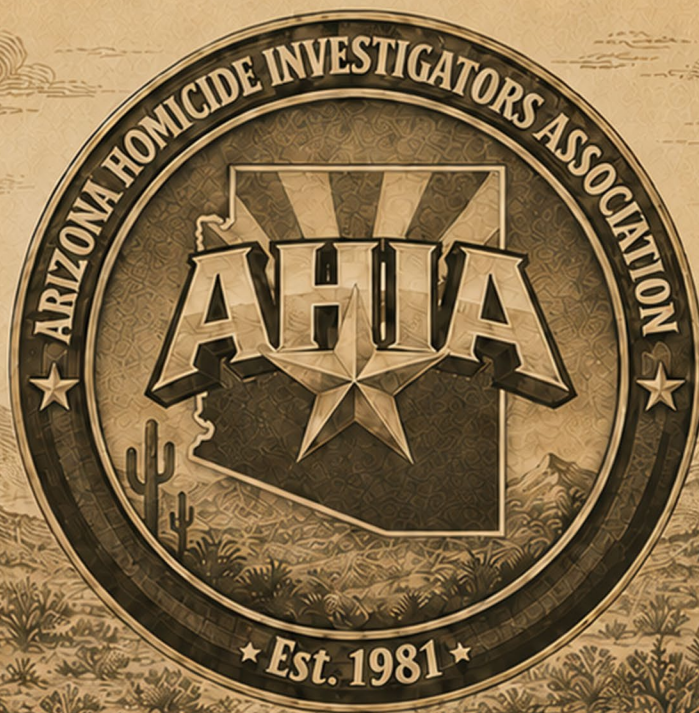

Early-registration will be held Sunday from 4PM to 8PM, with main registration beginning Monday at 7AM. Thank you again for attending, have a safe and productive week, and most importantly, take the opportunity to meet new people and strengthen the professional network that supports all of us in this important work.

WELCOME!

Stephen Palmer

Stephen Palmer, President
Arizona Homicide Investigators Association

The End

As with all things, we have reached the end of this year's conference. I would like to thank each of you for attending, and I hope you were able to take away something beneficial to your professional career and/or personal life, whether it was a lesson learned, a new contact made, or an idea sparked while speaking with a vendor. That is our Association's goal: to improve things every year, and that includes supporting and strengthening our members.

If you are not yet a member of AHIA, we encourage you to consider joining and becoming an active part of our Association. Membership provides free access to AHIA training, early registration opportunities for sponsored courses, and first announcement of both our annual Homicide School and the Annual Conference. If you are interested in becoming a member, please visit www.azhia.com for additional information.

Finally, we also encourage all members, and anyone interested, to sign up for the Association's email distribution list, available at the bottom of our website. This is the best way to stay informed about upcoming training opportunities and important updates. Our talented web administrator, Todd Ruggeri, works diligently to keep the site current and user-friendly. Please take a moment to explore it when you have the chance. Again, it's www.azhia.com

Stay safe and vigilant,

Stephen Palmer

GENESIS

The New Age of Digital Investigations

Agentic AI that moves teams from evidence overload to case clarity

Investigators are overwhelmed by the volume of digital evidence, and a case's progress depends on how quickly teams can find the leads, timelines and connections buried inside. Cellebrite Genesis brings agentic AI into digital investigations, surfacing key insights across massive, complex case data so investigators can analyze evidence faster and uncover connections that would otherwise take days or weeks to find.

Move Faster Through Complex Case Data

Real investigations don't arrive in one tidy format. Genesis helps teams reason across UFDRs, portable cases, call detail records, documents, media, warrant returns and device artifacts.

1 Prioritize what matters

Turn large evidence sets into focused leads, entities, timelines and connections that teams can validate instead of forcing every artifact through sequential review.

2 Connect evidence across the case

Bring together device data, reports, media, records and returns to reveal relationships that are difficult to see when evidence stays buried in separate files.

3 Validate findings quickly

Link every lead and insight back to supporting evidence, so the investigator can create a clear path to review, confirm, brief and decide what moves forward.

BUILT FOR SECURE, REVIEWABLE INVESTIGATIONS

Genesis supports AI-assisted review with oversight, source-linked outputs and controlled data handling.

- Surfaces relevant details, timelines and patterns for review without replacing investigative judgement.
- Links outputs back to supporting messages, media, records and device artifacts.
- Supports governed workflows for sensitive case data.

How Investigators Are Using Genesis

→ THEFT RING

Connected individuals, devices and activity across a criminal operation in as little as **5–10 minutes**.

→ HOMICIDE

Surfaced critical case-related content, including a key video, **in under two minutes**.

→ CHILD EXPLOITATION

Uncovered information linked to **16 potential victims** within 15 minutes of analysis.

→ JAIL CALLS

Reviewed **72 hours of recorded calls**, rapidly identifying admissions, connections and leads.

Examples reflect customer-reported outcomes from real investigations. Results vary based on case type, data volume and investigative objectives.

See how Genesis makes investigations faster and easier.

If you want to streamline your process and find evidence quickly, contact us to set up a demo.
