

THE COGNITIVE INTERVIEW

Don't miss one of the last opportunities to train with the Co-Founder and International expert in The Cognitive Interview.

Information is the lifeblood of investigations, and it is the ability of investigators to obtain useful and accurate information from eyewitnesses that is most crucial. Yet full and accurate memory recall is difficult to achieve.

This proficiency course will familiarize investigators with the Cognitive Interview (CI) technique. The CI is a systematic approach to interviewing witnesses toward increasing the amount of relevant information obtained without compromising the rate of accuracy.

The CI is based on scientifically derived principles of memory and communication theory as well as extensive analyses of law-enforcement interviews. The CI has been found in scientific studies to produce significantly more information than standard Q&A questioning. The CI is legally acceptable to the courts.

Attendees will learn about the nature of memory retrieval and how to conduct investigative interviews more effectively while avoiding the worst mistakes. Instruction includes participant role-play interviews with debriefings. Also included is a segment on techniques for detecting deception. Research shows that the reliability of red-flag indicators can be maximized through effective interview practices which comprise the CI for suspects (CIS).

Adopted by the U.S. Department of Justice as the standard for interviewing victims and witnesses, as well as, Law Enforcement Officers involved in Use of Force encounters. Supported by over 30 years of application by Law Enforcement investigators and over 500 international scientific research studies.

Money Back Guarantee

Experience the finest in law enforcement training. We guarantee you will be pleased with our courses. Or your money back! Over 7,000 Federal, State and local law enforcement officers trained internationally in seven years without a single request for a refund.

Instructors

Dr. R. Ed Geiselman
Co-Founder and Leading Expert

R. Edward Geiselman is the co-developer of the Cognitive Interview technique. He was a full Professor of Psychology at the University of California, Los Angeles, for 39 years; and currently he is on the faculty of Force Science. He earned his undergraduate degree from Purdue University in 1972 where he studied engineering and psychology. Subsequently, he earned both Master's and PhD degrees from Ohio University in experimental psychology.

Since joining the faculty at UCLA, he has published over 120 research papers in social-science and police-science journals. He is the author of five books including *The Psychology of Murder*, *Intersections of Psychology, Psychiatry, and Law* (Volumes 1, 2, & 3), *Eyewitness Expert Testimony*, and *Memory Enhancing Techniques for Investigative Interviewing: The Cognitive Interview*.

Professor Geiselman has conducted training and offered other consulting services for numerous investigative agencies including the FBI, Homeland Security, US Secret Service, US State Department, US Marshal's Service, Georgia and Tennessee Bureaus of Investigation, Los Angeles, Boston, Albuquerque, Syracuse, and Grand Junction Police Departments, Los Angeles Sheriff's Department, Indiana and Louisiana State Police, Las Vegas Metro, Singapore Police Force, Texas Rangers, Health and Human Services, NTSB, Los Angeles Metropolitan Transit Authority, U.S. Marine Corps, Walter-Reed Army Hospital, Beta Healthcare Group, Black Hat, and Hong Kong's Independent Commission Against Corruption.

He also has conducted investigative interviews for local police departments in ongoing cold-case Investigations and served as an expert on use-of-force incidents. Dr. Geiselman was awarded the Mary- Ellen McCormick award by the LASD in 2013 for his career contributions to the investigation of child abuse cases.
